“ *You were my sister not by blood but choice Morgan, we spend over 10 years together pretty much around the clock you were my everything. You were there when I had both my kids you helped me raise them. We had been thru so much and even though 7 years went by that I would talk to you you came back in my life 2 months and it was awesome but I didn't know how bad off you were and it killed me when I found out how bad you were when Jason did what he did and I fought tooth and nails getting you in the funeral getting your stuff getting you help for blood clots and mentally beca use you said soon as you could afford it you would overdose and go to him and the mobile crisis you told that to many time did nothing and the hospital you told and I told and they held you less than 2 days. They failed you . i did everything I physically could I spend close to 5 hundred dollars to help you. I knew that day you weren't in there and my heart was clear I love you still and not sure what emotion I should feel. I don't know when you lost the real Morgan in your body but I saw it in your eyes I hope your with Jason and happy and finally free. I love you so much and it kills me at time we started out in the same place don't know when you made a left turn I love you and until I see you again watch out over my babies please. I love you Morgan Dominic Loves you Sissy Loves you and Diego wish you happiness with Jason.*
