“ Rachel was both a mentor and a friend to me. I will forever be grateful to her for giving me an opportunity 17 years ago to be in the industry that she was so passionate about. Thank you, Rachel for taking me under your wings and teaching me the basics and more. You’ve been so good to me and my family. I will never forget your kindness. You will be missed.

JM

“ Rachel was a very brave, intelligent and emotionally strong person who over came tremendous personal challenges to achieve academic and professional success. Moreover, Rachel dedicated her life to improving the lives of others throughout her medical research career. On a personal note Rachel was a very good listener, and friend. Additionally, Rachel loved the simple things in life, taking walks, sitting by the water on a sunny spring day, and the beauty of nature. Moreover, Rachel loved to play canasta ( a card game) with our grandmother, cousins, and close friends for hours, laughing and exchanging stories. While eating potato chips, and French onion dip. Also, Rachel liked to read a good novel and watch movies, especially comedies. Personally Rachel was one of my heroes, someone I could count on and someone who always thought about the needs of others, a trait she came got from our Grandad. Finally, I am not sure what her final wish may have been, but I do know that she would not want you to cry, but would prefer that you celebrate her life by doing a small act of kindness. Like making a small donation to the Lupus Foundation of America, <https://www.lupus.org/> ,. Because Rachel worked very hard to find treatments to help Lupus patients and told me about how the Lupus Foundation of America was truly improving the lives of individuals with Lupus.

“ Rachel was an exceptional pharmaceutical professional. I worked with her briefly but learned so much from her. Her premature departure is a huge loss for all who knew her. May she rest in peace.
